Stericycle, Inc.
2333 Waukegan Road, Bannockburn, Illinois 60015

Dear Stericycle Talent Acquisition team,

I am writing to express my keen interest in the Data Analytics Internship position at Stericycle, as advertised. With a fervent passion for data science and a solid foundation in predictive modeling, I am excited about the opportunity to contribute to Stericycle's mission of protecting health and well-being in a safe, responsible, and sustainable way.

As a Statistics Junior at University of Illinois at Urbana-Champaign, I have dedicated myself to exploring the intricacies of data analysis and machine learning. My recent internship as an ATLAS Machine Learning Intern has provided me with invaluable experience in developing predictive machine learning models using Python. Collaborating closely with a multidisciplinary team, I utilized advanced techniques such as XGBoost, Random Forests, and Regression models to derive actionable insights from complex datasets. These experiences have not only enhanced my technical skills but also honed my ability to communicate effectively and work collaboratively towards common goals.

In addition to my technical skills, my role as a Course Assistant for STAT107 has further strengthened my ability to facilitate learning and collaborate with diverse teams. I have had the privilege of assisting over 1000 students in grasping fundamental data science concepts, conducting interactive sessions, and managing learning platform modifications. My experience as a Management Intern at KM Internacional S.A. has equipped me with valuable project management skills and a strong sense of accountability, further complementing my ability to thrive in a fast-paced environment.

What excites me most about the opportunity at Stericycle is the chance to leverage my skills and expertise to contribute to innovative solutions that protect the environment, people, and public health. Stericycle's commitment to fostering an inclusive culture where team members feel welcome, valued, and heard resonates deeply with me, and I am eager to contribute to a diverse and collaborative environment.

Thank you for considering my application. I am enthusiastic about the opportunity to join Stericycle and contribute to your team. I am confident that my blend of technical proficiency, collaborative spirit, and passion for data science make me a strong candidate for this position. I look forward to the possibility of discussing how my skills and experiences align with the needs of your organization.

Sincerely,

Sangjun Ko
