AGCO Acceleration Center  
2001 S. First St. Champaign, IL

Dear Hiring Manager,

I am writing to express my enthusiasm for the Data Product Intern position at AGCO, as advertised. With a strong academic background in statistics and data science, coupled with practical experience in predictive machine learning models, I am excited about the opportunity to contribute to AGCO's mission of addressing global challenges in agriculture and climate change.

As a current undergraduate student pursuing a degree in Statistics at the University of Illinois Urbana-Champaign, I have developed a deep understanding of data analytics and its applications in solving real-world problems. My internship experience as an ATLAS Machine Learning Intern, where I developed predictive machine learning models using Python, has equipped me with the technical skills and expertise required to excel in this role. Leveraging advanced techniques such as XGBoost, Random Forests, and Regression models, I have gained valuable insights from complex datasets, which I believe will be beneficial in defining and communicating AGCO's Telemetry Data Product.

I am particularly drawn to AGCO's commitment to innovation and sustainability in agriculture. The opportunity to collaborate with industry experts at the AGCO Acceleration Center to develop possible future business use cases and document requirements aligns perfectly with my academic background and career aspirations. I am eager to leverage my skills in PowerPoint to create effective communication materials that will contribute to the success of AGCO's initiatives.

Furthermore, my experience as a Course Assistant for STAT107 has enhanced my ability to facilitate learning and collaborate effectively with diverse teams, qualities that I believe are essential for success in this role. While I do not have previous work experience as a consultant or data scientist, I am confident in my ability to quickly adapt and contribute positively to the team.

I am excited about the opportunity to join AGCO as a Data Product Intern and make a meaningful contribution to the company's mission of feeding the world's growing population while addressing climate change. Thank you for considering my application. I look forward to the opportunity to discuss how my skills and experiences align with the needs of AGCO.

Sincerely,

Sangjun Ko
