## WORK EXPERIENCE

### Kimberly-Clark — North America Family Care R&D

Neenah, Wisconsin

*Statistician (contract assignment through Staffmark Group)*

June 2025 – Present

- Serve as statistical lead for 15+ completed and ongoing Test Method Validation and measurement-system studies; develop study designs, sample-size recommendations, randomized and blinded run orders, acceptance criteria, analyses, and qualification recommendations in coordination with laboratory, test-method, product, and quality teams.
- Lead statistical planning for product- and claim-supporting work spanning R&D, quality, product release, and design verification; translate findings into recommendations for method design, equipment qualification, follow-up testing, and investigation of unexpected performance patterns.
- Analyze an average of six requested mannequin leakage studies per month across two business units, interpreting product performance and failure patterns for product release, prototype screening, material qualification, DOE, competitive benchmarking, and consumer-study support.
- Design and analyze DOE-based studies for a Youth TMD mannequin screening method intended to replace portions of multi-month consumer home-use testing with a three-week screen, with projected multimillion-dollar savings.
- Designed and maintain a Python/Flask reporting application that replaced a retiring legacy workflow, enabling 50+ researchers and technicians to generate standardized statistical reports in minutes rather than waiting several days; serve as a primary technical contact for the internal analytics platform.
- Maintain and further train established product-performance models, coordinate laboratory testing, design supporting experiments, analyze new data, and deploy self-service interfaces that improve model visibility and access across R&D.

### Applied Technologies for Learning in Arts & Sciences

Champaign, Illinois

*AI/ML Intern Team Leader*

January 2024 – December 2024

- Led five interns and coordinated priorities with three managers while developing Python machine-learning models using datasets containing 100,000+ records.

### HappySneeze

Remote

*Market Research Intern*

August 2024 – September 2024

- Created an interview guide, conducted 10+ consumer interviews on menopause and pelvic-floor health needs, and synthesized findings into product and market recommendations.

### University of Illinois Urbana-Champaign

Champaign, Illinois

*Undergraduate Course Assistant, Data Science and Professional Statistics*

August 2023 – May 2025

- Mentored 300+ students in data science and statistical consulting and maintained instructional content for a learning platform serving 1,000+ students.

## EDUCATION

### University of Illinois Urbana-Champaign

Champaign, Illinois

B.S. Statistics, Mathematics Minor; GPA: 3.93/4.00

May 2025

### University of Michigan–Shanghai Jiao Tong University Joint Institute

Shanghai, China

Mechanical Engineering coursework; transferred to UIUC; First Class Scholarship

2019 – 2020

## SKILLS

|                             |                                                                                                                                                                      |
|-----------------------------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>Statistical/R&amp;D:</b> | DOE, TMV, Gauge R&R/MSA, mixed models, ANOVA, multiple comparisons, regression, attribute agreement, bias/precision analysis, equipment equivalency, method transfer |
| <b>Technology:</b>          | Python, R, JMP, Flask, Pandas, NumPy, SciPy, statsmodels, scikit-learn, Excel/VBA, SQL, Git, JavaScript, HTML/CSS                                                    |
| <b>Languages:</b>           | Korean and Spanish (native); English (fluent)                                                                                                                        |
