Gravity Research  
600 New Hampshire Avenue NW, 4th Floor  
Washington, DC 20037

Dear Hiring Manager,

I am excited to apply for the Government Affairs Research Analyst position at Gravity Research. As a student pursuing a Bachelor of Science in Statistics at the University of Illinois at Urbana-Champaign, with minors in Mathematics and Data Science, I am eager to contribute my analytical and research skills to your Stakeholder Influence Analysis team. My background in data-driven decision-making and strategic analysis aligns well with the responsibilities of this role.

In my current role as a Consultant at Illinois Business Consulting, I collaborate with interdisciplinary teams to provide strategic solutions to clients, conducting in-depth research, synthesizing data, and developing actionable recommendations. This experience has strengthened my ability to analyze complex policy and business issues and present insights effectively to stakeholders.

Additionally, as an AI/ML Intern Team Leader at the Applied Technologies for Learning in Arts & Sciences department, I have led a team in developing predictive models and conducting large-scale data analysis using tools such as Python and Excel. This experience has honed my ability to manage multiple projects, deliver high-quality analytical outputs, and communicate findings to both technical and non-technical audiences.

My ability to manage competing priorities, coupled with my strong research and writing skills, make me well-suited for this position. I am particularly excited about the opportunity to engage with key policy issues across various sectors and support Gravity Research's mission of empowering organizations with actionable insights.

I would welcome the opportunity to discuss how my background and skills align with your needs. Thank you for considering my application. I look forward to the possibility of contributing to your team.

Sincerely,

Sangjun Ko
