Hiring Manager

Doosan Bobcat North America

West Fargo, ND / Statesville, NC

Dear Hiring Manager,

I am excited to apply for the Data Analytics Internship/Co-op position at Doosan Bobcat North America. As a Statistics major at the University of Illinois at Urbana-Champaign with minors in Mathematics and Data Science, I have always been drawn to how data can tell a story and drive smarter business decisions. The idea of using analytics to identify market trends, optimize sales strategies, and help a company like Bobcat grow is exactly what excites me about this opportunity.

Recently, as an AI/ML Intern Team Leader, I worked with large datasets to build predictive models and create dashboards using Python, SQL, and Power BI. One of my favorite projects involved automating sales reports, making it easier for stakeholders to track key performance indicators and uncover trends. This experience reinforced how powerful data can be in shaping business decisions, and I see a direct connection to the type of analysis and reporting Bobcat is looking for in this role.

At Illinois Business Consulting, I worked on market research and financial modeling for clients across various industries. I collaborated with teams to analyze sales data, identify growth opportunities, and develop strategies based on real-world insights. This hands-on experience helped me understand the importance of not just collecting data, but making it meaningful and actionable—something I know will be critical at Bobcat when working on business intelligence reports and evaluating sales performance.

Beyond the technical side, I enjoy working in fast-paced, team-oriented environments where data plays a key role in decision-making. Bobcat's reputation for innovation and its commitment to empowering people through its products align with my own values, and I would love the opportunity to contribute to the team.

I would welcome the chance to discuss how my background and skills align with this position. Thank you for your time and consideration—I look forward to hearing from you.

Sincerely,

Sangjun Ko
