Washington, DC 20037

Dear Hiring Manager,

I am excited to apply for the Research Analyst Internship (Remote) at MarketMaker CRE. As a senior pursuing a Bachelor of Science in Statistics at the University of Illinois at Urbana-Champaign, with minors in Mathematics and Data Science, I am eager to apply my analytical skills and research experience to support your team's objectives.

Through my role as an intern team leader at the Applied Technologies for Learning in Arts & Sciences department, I have led data-driven projects, developing statistical models and generating actionable insights. This experience has enhanced my ability to collect and analyze large datasets, collaborate with cross-functional teams, and effectively communicate findings to stakeholders.

In addition to my academic and internship experience, I have served as a consultant at Illinois Business Consulting, where I contributed to market analysis and strategic recommendations for clients across various industries. Collaborating with interdisciplinary teams has strengthened my problem-solving abilities and my capacity to develop data-driven solutions that align with business goals.

I am proficient in data analysis tools such as Python, R, and Excel, and possess strong organizational and communication skills that enable me to manage multiple projects effectively. Market-Maker CRE's focus on providing data-driven insights to inform strategic decisions aligns perfectly with my interests, and I am excited about the opportunity to contribute to your initiatives.

I welcome the opportunity to discuss how my skills and experiences align with the needs of the role. Thank you for your time and consideration. I look forward to hearing from you soon.

Sincerely,

Sangjun Ko
