Hiring Manager
BarkleyOKRP
Chicago, IL

Dear Hiring Manager, I am excited to apply for the Data Analytics Internship at BarkleyOKRP. As a senior majoring in Statistics with a minor in Mathematics at the University of Illinois Urbana-Champaign, I have built a strong analytical foundation and a passion for uncovering insights that drive impactful business decisions. The intersection of data, marketing, and strategy fascinates me, and I am eager to bring my skills to a company that values consumer-centered branding and data-driven storytelling.

My experiences in data analysis, machine learning, and business intelligence have given me hands-on exposure to real-world data challenges. As a Research Assistant at UIUC, I worked on statistical modeling projects that examined behavioral patterns in consumer data. In addition, my work at the Technology Services department at UIUC allowed me to collaborate with cross-functional teams to streamline data-driven decision-making using tools like Python, SQL, and Tableau. These experiences have sharpened my ability to extract key insights, build visual dashboards, and present data-driven recommendations to stakeholders—skills that directly align with this role.

Beyond my technical expertise, my diverse background and cultural experiences have shaped my perspective on consumer behavior. Having traveled and worked with communities in Latin America, including in Nicaragua, I have witnessed firsthand how cultural and economic factors influence purchasing decisions. This global perspective drives my curiosity to understand the "why" behind the data, making me a strong fit for BarkleyOKRP's commitment to putting consumers at the core of branding strategies.

I thrive in collaborative, fast-paced environments and am eager to contribute my data analysis, visualization, and storytelling skills to BarkleyOKRP's dynamic team. I would love the opportunity to further discuss how my experiences align with this role. Thank you for your time and consideration.

Sincerely,

Sangjun Ko
