Hiring Manager
Clipboard Health

Dear Hiring Manager,

I am excited to apply for the Sales Data Analyst position at Clipboard Health. As a senior majoring in Statistics with a minor in Mathematics at the University of Illinois Urbana-Champaign—graduating in May 2025 and set to begin my graduate studies in Fall 2025—I have cultivated a strong technical foundation and real-world experience that directly align with the responsibilities of this role. For example, as an AI/ML Intern Team Leader at the Applied Technologies for Learning in Arts & Sciences, I led a team to develop predictive models on large datasets using Python and SQL. I performed data extraction, cleansing, and transformation to build accurate models, and I developed detailed Excel dashboards that incorporated advanced formulas and pivot tables to monitor key performance metrics. These projects not only refined my technical abilities but also enhanced my capacity to communicate complex data findings to both technical and non-technical stakeholders.

Additionally, during my time as an Undergraduate Course Assistant for STAT107 and STAT443, I managed data for over 100 students and streamlined course material updates using Google Sheets and Microsoft Excel. I was responsible for generating weekly reports and presenting data insights that directly supported decision-making processes. My hands-on experience with SQL for data manipulation and my ability to develop actionable insights from large datasets have prepared me to contribute effectively to Clipboard Health's sales operations. I am particularly drawn to this role because it offers the opportunity to merge my technical skills with my passion for data-driven business strategy—ensuring that CRM data becomes a powerful tool for optimizing sales performance and driving impactful decisions.

Thank you for considering my application. I look forward to the opportunity to further discuss how my background and experience can help advance Clipboard Health's mission.

Sincerely,

Sangjun Ko
