Hiring Manager
Ensaras
Champaign, IL

Dear Hiring Manager,

I am excited to apply for the AI and Machine Learning Ops Intern position at Ensaras. As a senior majoring in statistics with a minor in mathematics at the University of Illinois Urbana-Champaign, I have developed strong expertise in machine learning, data engineering, and cloud-based model deployment. This opportunity aligns with my passion for applying AI and data-driven solutions to environmental and engineering challenges.

My experience in artificial intelligence and machine learning includes leading a team as an AI/ML intern team leader, where I worked with Python, Scikit-learn, and TensorFlow to develop predictive models and optimize large-scale datasets. I have hands-on experience in cloud computing and DevOps, implementing machine learning models on AWS and streamlining workflows for efficient deployment. Additionally, my coursework in statistical consulting and Bayesian analysis has provided me with a strong foundation in data wrangling, feature engineering, and model validation.

Beyond academics, I placed 3rd in the 2024 COVID Information Commons Student Paper Challenge, where I applied geospatial analysis and deep learning techniques to assess the socioeconomic and mental health impacts of COVID-19 in Mexico. This project reinforced my ability to work with large datasets, optimize AI pipelines, and extract actionable insights—all critical skills for AI-driven wastewater treatment optimization.

I am eager to contribute my machine learning expertise, cloud computing experience, and problem-solving mindset to Ensaras' mission of preserving our world's most precious resource. I welcome the opportunity to discuss how my skills align with this role. Thank you for your time and consideration, and I look forward to the possibility of joining your team.

Sincerely,

Sangjun Ko
