Hiring Manager
International Monetary Fund
Washington, DC

Dear Hiring Manager,

I am excited to apply for the Information Management / Research Analyst position at the International Monetary Fund. As a senior majoring in statistics with a minor in mathematics at the University of Illinois Urbana-Champaign, I have developed expertise in data analysis, statistical modeling, and database management. I will be continuing my studies in graduate school this fall, further strengthening my analytical and technical skills.

As an AI/ML intern team leader, I have worked extensively with large datasets, using Python, R, and SQL to develop predictive models and automate data workflows. My role as a consultant at Illinois Business Consulting has strengthened my ability to analyze financial trends, interpret macroeconomic indicators, and communicate insights effectively. Additionally, my experience as a course assistant for STAT443 has provided hands-on exposure to statistical consulting, reinforcing my ability to work with cross-functional teams.

I also placed third in the 2024 COVID Information Commons Student Paper Challenge, where I analyzed the socioeconomic and mental health impacts of COVID-19 in Mexico. Using statistical and geospatial analysis, I identified trends in unemployment and income inequality, proposing data-driven policy interventions. This experience deepened my understanding of how macroeconomic factors influence financial stability, aligning closely with the IMF's mission.

I thrive in high-pressure environments and have demonstrated the ability to manage multiple priorities effectively. My structured approach to data processing, problem-solving mindset, and attention to detail would allow me to contribute meaningfully to the IMF's research initiatives. I welcome the opportunity to further discuss how my skills align with this role.

Thank you for your time and consideration. I look forward to the possibility of contributing to the IMF's research efforts.

Sincerely,

Sangjun Ko
