Hiring Manager

Ki Mobility

Stevens Point, WI

Dear Hiring Manager,

I am excited to apply for the Data Analyst position at Ki Mobility. I am currently a senior at the University of Illinois Urbana-Champaign, majoring in Statistics with a minor in Mathematics, and set to graduate in May 2025. My academic background, combined with practical experience in data analysis and reporting, has prepared me to contribute effectively to your team while driving data-driven decision-making across supplier performance, inventory demand, and sales trend analysis.

In my role as an AI/ML Intern Team Leader, I successfully led projects that involved extracting, cleaning, and analyzing large datasets using SQL and Python. I developed dashboards and reports using Excel—leveraging advanced formulas and pivot tables—to monitor key performance indicators and provide actionable insights to stakeholders. Additionally, as an Undergraduate Course Assistant for STAT107 and STAT443, I managed and visualized extensive datasets to support class initiatives, which honed my ability to communicate complex findings clearly to both technical and non-technical audiences.

I am particularly drawn to Ki Mobility due to your focus on integrating data analysis with operational excellence to drive business outcomes. I am eager to utilize my skills in SQL, Excel, and data visualization to generate insightful reports that inform strategic decisions and streamline processes across the organization. My strong analytical skills, attention to detail, and collaborative mindset make me a great fit for this role.

Thank you for considering my application. I look forward to the opportunity to discuss how my background and skills align with the goals of Ki Mobility, and how I can help your team deliver on its mission.

Sincerely,

Sangjun Ko
