Hiring Manager
OverDrive
Cleveland, OH

Dear Hiring Manager,

I am excited to apply for the Data Analyst Intern position at OverDrive. As a senior majoring in Statistics with a minor in Mathematics at the University of Illinois Urbana-Champaign, I have built a strong analytical foundation and a passion for uncovering insights that drive impactful business decisions. The intersection of data, marketing, and strategy fascinates me, and I am eager to bring my skills to a company that values innovative digital solutions and consumer-centered storytelling.

My experiences in data analysis, machine learning, and business intelligence have given me hands-on exposure to real-world data challenges. In my role as an AI/ML Intern Team Leader, I led a team in developing predictive models and transforming large datasets using Python and advanced statistical techniques. Additionally, my work as a Course Assistant in Data Science Discovery and Professional Statistics has allowed me to collaborate with diverse teams, streamline data processes, and present actionable insights to both academic and non-technical stakeholders—experiences that have sharpened my abilities in SQL, Python, and data visualization tools.

Beyond my technical expertise, my diverse background and cultural experiences have shaped my perspective on consumer behavior. Growing up and working in various international environments, I have seen firsthand how cultural and economic factors influence decision-making. This global perspective drives my curiosity to understand the “why” behind the data, aligning with OverDrive’s commitment to delivering digital content that resonates with a wide audience.

I thrive in collaborative, fast-paced environments and am eager to contribute my data analysis, visualization, and storytelling skills to OverDrive’s dynamic team. I would welcome the opportunity to discuss how my background and experiences can support your goals. Thank you for your time and consideration.

Sincerely,

Sangjun Ko
