Hiring Manager

Quill Corporate Facility, Staples Inc.

Lincolnshire, IL Dear Hiring Manager,

I am excited to apply for the Data Science Intern position at Quill, starting in June 2025. I am a senior majoring in Statistics with a minor in Mathematics at the University of Illinois Urbana-Champaign and have been accepted into graduate studies beginning in Fall 2025. My academic and professional experiences have provided me with a strong analytical foundation and a passion for leveraging data to drive meaningful business decisions.

During my time as an Undergraduate Course Assistant in both STAT107 Data Science Discovery and STAT443 Professional Statistics, I developed hands-on expertise in statistical analysis and data visualization. Additionally, my role as an AI/ML Intern Team Leader allowed me to lead a team in developing predictive models using Python, SQL, and advanced statistical techniques. These experiences have not only honed my technical skills but also enhanced my ability to communicate complex findings to non-technical stakeholders—a crucial asset in any data-driven environment.

I am particularly drawn to this opportunity at Quill because of its commitment to innovation and collaboration. I appreciate the inclusive culture at Staples and the emphasis on fostering professional growth through mentorship and real-world projects. I am eager to contribute to small and moderate-scale data projects, participate in A/B testing and exploratory analyses, and help construct data-driven models that influence marketing, product, and promotional strategies.

Thank you for considering my application. I look forward to the opportunity to further discuss how my background, technical proficiency, and passion for data science can contribute to the success of Quill and Staples Inc.

Sincerely,

Sangjun Ko
