Hiring Manager

Resolution Economics, LLC

Chicago, IL Dear Hiring Manager,

I am excited to apply for the Research Assistant – Intern position at Resolution Economics. As a senior majoring in Statistics with a minor in Mathematics at the University of Illinois Urbana-Champaign, I have developed strong analytical skills, meticulous attention to detail, and a passion for data-driven research. I am eager to apply my experience in data management and office support to contribute to your team's success.

In my role as an Undergraduate Course Assistant for STAT107 and STAT443, I was responsible for managing course materials, performing data entry, and creating detailed reports and visualizations in Microsoft Office. These tasks required precise data handling and a proactive approach to problem-solving—skills that I am confident will translate well to the data management and clerical duties at Resolution Economics.

Additionally, during my internship at KM Internacional, I led a team to streamline administrative operations and ensure high accuracy in record-keeping. This experience honed my ability to work efficiently under pressure, maintain high standards of quality, and support overall office operations—qualities that are directly relevant to the responsibilities outlined for this position, such as database creation, internet research, and office upkeep.

I am particularly attracted to this role because it offers an opportunity to gain insight into how economic data is used within the legal system. I am keen to learn how statistical analysis tools like SAS can be applied in a consulting environment, and I look forward to the prospect of being mentored by experienced staff while contributing to real-world projects.

Thank you for considering my application. I welcome the opportunity to discuss how my background and experiences align with the goals of Resolution Economics, and how I can add value to your team as a Research Assistant.

Sincerely,

Sangjun Ko
