Hiring Manager
The TerraCotta Group
2321 Rosecrans Avenue, Suite 3270
El Segundo, CA 90245

Dear Hiring Manager,

I am excited to apply for the Analyst - Data Science position at The TerraCotta Group. As a senior majoring in statistics with a minor in mathematics at the University of Illinois Urbana-Champaign, I have developed strong analytical and problem-solving skills that align well with this role. I will be continuing my studies in graduate school this fall, further strengthening my expertise in statistical modeling, machine learning, and data-driven decision-making.

My academic and professional experiences have equipped me with the technical skills necessary to support TerraCotta's investment strategies. As an AI/ML intern team leader, I have worked extensively with large datasets, developing predictive models using Python, R, and SQL. My experience with data visualization tools such as Tableau and Power BI has allowed me to transform complex data into actionable insights. Additionally, my work as a consultant at Illinois Business Consulting has refined my ability to analyze financial data, conduct market research, and present findings to stakeholders.

Beyond technical proficiency, I thrive in collaborative environments that encourage independent thinking and innovation. My coursework in statistical consulting and advanced data analysis has prepared me to profile, clean, and integrate new data sources, ensuring data quality and reliability. Additionally, my research experience, including my participation in the COVID Information Commons Student Paper Challenge, has strengthened my ability to apply statistical methodologies to real-world economic trends.

I am eager to contribute my data science expertise and problem-solving abilities to The TerraCotta Group's mission of blending advanced analytics with real estate credit strategies. I would welcome the opportunity to further discuss how my skills align with this role. Thank you for your time and consideration, and I look forward to the possibility of joining your team.

Sincerely,

Sangjun Ko
