Hiring Manager
Department of Radiology
University of Pittsburgh
Pittsburgh, PA

Dear Hiring Manager,

I am excited to apply for the Research Assistant position at the University of Pittsburgh. As a senior majoring in statistics with a minor in mathematics at the University of Illinois Urbana-Champaign, I have developed strong analytical and machine learning skills that align with this role. I will be continuing my studies in graduate school this fall, further deepening my expertise in statistical modeling and computational research.

My experience in artificial intelligence and deep learning includes leading a team as an AI/ML intern team leader, where I developed predictive models using Python and implemented techniques such as neural networks, transformers, and ensemble learning. I have worked with large-scale datasets, applying deep learning frameworks including TensorFlow and PyTorch to optimize information processing workflows. Additionally, my coursework in statistical consulting and Bayesian analysis has strengthened my ability to analyze complex medical data with rigorous statistical methodologies.

Beyond technical expertise, I am passionate about applying machine learning to medical research. My research experience includes participation in the COVID Information Commons Student Paper Challenge, where I conducted statistical analyses on public health data to assess the socioeconomic impact of the pandemic. This project reinforced my interest in using data-driven approaches to improve healthcare outcomes.

I am eager to contribute my machine learning expertise and problem-solving abilities to your research team. I welcome the opportunity to further discuss how my skills align with this position. Thank you for your time and consideration, and I look forward to the possibility of joining your team.

Sincerely,

Sangjun Ko
