Caroline Andy, MS
Weill Cornell Medicine
Department of Population Health Sciences
New York, NY

Dear Ms. Andy,

I am excited to apply for the Weill Cornell Medicine Biostatistics Summer Internship. As a senior majoring in statistics with a minor in mathematics at the University of Illinois Urbana-Champaign, I am eager to apply my analytical skills to public health research while gaining hands-on experience in biostatistics and healthcare data analysis. I will be continuing my studies in graduate school this fall, further deepening my expertise in statistical modeling and data-driven decision-making.

My academic coursework in statistical consulting, Bayesian analysis, and advanced data analysis has provided me with a strong foundation in statistical methodologies relevant to biostatistical research. As an AI/ML intern team leader, I have worked extensively with large datasets, developing predictive models and applying data visualization techniques using R and Python. Additionally, my experience as a consultant at Illinois Business Consulting has strengthened my ability to analyze healthcare data, identify key trends, and communicate findings effectively.

Beyond technical skills, I am passionate about using data-driven approaches to address public health challenges. My research experience includes working on projects such as the COVID Information Commons Student Paper Challenge, where I analyzed the socioeconomic and mental health impacts of COVID-19 in Mexico and proposed data-driven interventions based on statistical and geospatial analysis. This experience reinforced my interest in leveraging statistical methodologies to improve healthcare access and quality.

I am eager to contribute my analytical skills and problem-solving abilities to the Weill Cornell Medicine Biostatistics Internship while learning from experienced professionals in the field. I would welcome the opportunity to discuss how my background aligns with this program. Thank you for your time and consideration, and I look forward to the possibility of joining your team.

Sincerely,

Sangjun Ko
