The Prestige Group

Dear Hiring Manager,

I am excited to apply for the Data Analyst position at The Prestige Group. As a Statistics major at the University of Illinois at Urbana-Champaign, with minors in Mathematics and Data Science, I am eager to leverage my analytical skills and technical expertise to contribute to your organization's strategic decision-making processes.

In my role as an AI/ML Intern Team Leader at the Applied Technologies for Learning in Arts & Sciences department, I led a team in developing predictive models using Python and advanced machine learning techniques, such as XGBoost and Neural Networks. I also created interactive dashboards using Tableau to present insights derived from large datasets, enhancing decision-making for stakeholders. This experience taught me how to transform complex data into clear, actionable insights and collaborate with cross-functional teams effectively.

Additionally, as a Consultant with Illinois Business Consulting, I worked on data-driven market analysis projects, which required SQL-based data extraction and statistical modeling to identify business opportunities. Collaborating closely with diverse teams, I honed my ability to interpret complex data, visualize trends, and communicate findings to both technical and non-technical audiences.

I am proficient in Python, R, SQL, and data visualization tools like Tableau and Power BI. My attention to detail and passion for problem-solving have consistently driven my ability to uncover meaningful insights that support organizational goals. I am particularly excited about The Prestige Group's commitment to fostering innovation through data-driven strategies and a collaborative work culture.

I would welcome the opportunity to bring my skills to your team and contribute to delivering impactful insights that drive performance. Thank you for considering my application. I look forward to the possibility of discussing how I can support The Prestige Group's success.

Sincerely,

Sangjun Ko
